EXPERIENCE

Manufacturing Engineer – Levels I & II

Oct 2023 – Present

Formlabs – Somerville, MA

- Leader of manufacturing design for next-generation printer program, spearheading manufacturing project management, design of 24 calibration and test fixtures, process development, and DFM/DFA
- Owner of full calibration/test jig & fixture suite for Form4L through NPI, product launch, and production ramp; released 30 production testers (120+ unique parts and assemblies) and implemented onsite
- Built scalable framework for calibration & test hardware design, qualification, and long-term maintenance
- Owner of Mfg. Engineering internship pipeline; sourcing, hiring, managing, and mentoring 4+ interns & co-ops

Engineering Intern – Interior Innovation

May 2022 – Aug. 2022

Rivian – Plymouth, MI

- Developed department-wide innovation project dashboard, tracking 80+ active projects along cycle of Application Readiness; submitted 3 invention disclosures for individual innovation projects
- Authored testing standards and specifications for a variety of interior applications, including decorative chrome attributes, corrosion life cycle, and volatile organic compound emissions; delivered cost savings and increased consistency in material and component validation testing
- Led cross-organizational project management with decorative chrome supplier, delivering 18% average yield increase and \$3.58 cost savings per vehicle with additional proposed improvements across 13 unique parts

Process Engineering Intern – R1 Body

Jun. 2021 – Aug. 2021

Rivian – Normal, IL

- Authored work instructions and designed manufacturing fixtures for launch of new R1 body line; developed service part production roadmap and prototype tools
- Designed visual aids and additively manufactured templates for sealant applications and weld fixture quality checks
- Led shop-wide quality improvement projects: Optimized process map for bodysides material flow; Coordinated sealant application quality improvement; and Implemented battery frame line Poka-yoke tooling modifications

Manufacturing Engineering Intern – General Assembly

Jan. 2021 – Apr. 2021

Tesla, Inc. – Fremont, CA

- Designed and implemented battery lifter equipment swap at critical bottleneck in general assembly line of Model 3
- Supported production engineering team through time studies of manufacturing process, identification of waste, and equipment and process redesign aimed at continuous improvement

Technical Experience & Skills

CAD (Onshape, SolidWorks, Catia), FEA, Programming (Python, SQL, MATLAB, C/++), Project Management, Product Design, Technical Communication, Root Cause Analysis, DFM/DFA, Machining (Lathe, Vertical Mill, CNC), 3D Printing

EDUCATION

The Ohio State University, Columbus, OH

December 2022

B.S. Mechanical Engineering, Minor in Business

Overall GPA: 3.98

Summa Cum Laude; with Honors in Integrated Business and Engineering

MEMBERSHIPS

Integrated Business and Engineering (IBE) Honors Program

Aug. 2018 – Dec. 2022

Formula Buckeyes SAE Project Team – Brakes & Ergonomics Lead

Nov. 2018 – Jun. 2022

Alpha Phi Omega, Alpha Iota Chapter – Secretary

Sept. 2019 – Dec. 2022

Fundamentals of Engineering for Honors (FEH) Program

Aug. 2018 – Apr. 2019
